FHA mortgage insurance allows a homebuyer to make a modest down-payment and obtain a mortgage for the balance of the purchase price. The mortgage loan is made by a FHA-approved lender. HUD insures the loan and pays the lender if the borrower defaults on the mortgage. Because the lender is protected by this insurance, it can offer more liberal mortgage terms than might otherwise be obtained. HUD does not make direct loans to help people build or buy homes.

LEAD BASED PAINT HAZARD PROGRAMS AND INFORMATION

Lead Based Paint Hazard Programs and Information

Continued exposure to lead results in severe health problems in children, including learning disabilities and behavior problems. Pre-1978 housing presents the most risk:

a) HUD Lead Hazard Reduction Program

Through HUD funding competitions, several areas of the state have funds available to reduce lead based paint hazard exposure in affordable housing. Owner-occupied housing units must be occupied by families at or below 80% of the county median income. Vacant rental units must be marketed to families. Children under age 6 living in the unit must have a blood test within 6 months prior to construction activities in order for the family to receive assistance. Priority will be given to households occupied by children that have high levels of lead in their blood. Hazard reduction activities will be determined by certified risk assessors, and certified contractors must perform the work. Units assisted must pass federal clearance levels at project completion.
